*Always remember to eat fruits such as oranges, cantaloupes, and mangoes for a good source of Vitamin C!*

# Camping Activities at Home

---

## Art: Leaf Rubbing Collage

---

### SUPPLIES:

- Crayons
- Paper
- Leaves

### Process

Take a walk around your yard or the park and collect some leaves of different sizes, colors and textures. Place the leaves under the paper and rub the crayon over the leaves. Watch as the print rises and you can talk about how you can see the veins of the leaf, the different colors of leaves, and why the leaves turn different colors and textures.

## Visual and Performing Arts: Making Binoculars and Going on a Scavenger Hunt

---

### SUPPLIES:

- 2 toilet rolls
- Stapler
- Ribbon
- Art supplies to decorate (Ex. stickers, markers, paint)
- Tape

### Preparation

You can start by decorating the rolls and then staple them together by putting rolls together length wise and stapling them from inside the holes. Now get some tape and tape the ends of the ribbons to the inside of the rolls. When you are finished making the binoculars you can go outside and do a scavenger hunt for bugs, leaves, or use them to look at the stars. You can go on YouTube to see how they are made.
